

## Aim and Scope

Kawasaki Medical Journal (KMJ) is an official journal published by Kawasaki Medical Society, located in Kurashiki-city, Okayama-prefecture, Japan.

The scope of KMJ is all fields of medical sciences. KMJ features definitive studies on medical sciences and provide comprehensive and original information to a worldwide readership.

The journal comprises articles that contribute to progress in research not only in basic medical sciences but also in clinical investigations, aiming to cover all aspects of medical and health sciences. The journal provides the best of up-to-date information on modern medical and health sciences, presenting readers with high-impact, original work focusing on pivotal issues.

## Editorial policies

### Peer review

Editorial board members, as well as a large group of external reviewers who have broad expertise in research areas of medical sciences, will fairly and thoroughly evaluate manuscripts submitted to KMJ.

### Conflicts of interest

Authors must indicate whether or not they have a financial relationship with the organization that sponsored the research. Therefore, a manuscript must be accompanied by the “ICMJE Form for Disclosure of Potential Conflicts of Interest” (available at <http://www.icmje.org/conflicts-of-interest/>) at the time of submission. Also a note should be added in a separate section in the manuscript before the reference list as follows;

### Prior publication

Editors and reviewers are expected to maintain a strict ethical code regarding the confidentiality of the material under review. After the review, authors will be promptly informed of editorial decisions. Only written inquiries regarding the status of manuscripts will be answered. The copyright of articles accepted by this journal will be transferred from authors to the Kawasaki Medical Society.
